XMT-2500

AUTOMATIC SHUTTLE MAP/GAS
FLUSH HEAT SEAL MACHINE

The 2500 series Gas Flush sealers are our most versatile size packaging machines. Large enough to handle volume production in a factory setting, but small enough to be used in a one location operation, this mid-sized shuttle machine can be designed to seal most common containers and packaging in today's market. The larger machine size allows multiple containers to be sealed in one operation thus saving time, reducing film waste and maximizing inert gas consumption. Stock tooling is available in most common container shapes and sizes and customized tooling for your individual container application can be ordered with minimal lead times.

FAST

- Automatic feed and seal feature
- Display shows number of cycles sealed in shift
- 5 minute warm up time
- Simple pocket and die change over
- Seals up to 8 cycles per minute, depending on tray size and material

VERSATILE

- Interchangeable pockets and dies
- Custom pockets and dies available
- Choice of automatic or manual seal
- Optional date printer
- Adjustable heat settings & dwell time
- Registered print capability

SAFE

- Automatic Shut Off to Prevent Injury
- All moving mechanisms are guarded, closing off potential pinch points

QUALITY

- Die cuts around container for an attractive look
- Consistent, Leak-Proof Seals
- Film tensioner provides a wrinkle-free seal
- Low maintenance
- Heavy duty, stainless steel construction
- 12 month warranty on parts
- Digital controls with microcomputer program
