# XST-2000

## AUTOMATIC SHUTTLE
## HEAT SEAL MACHINE

The XST-2000 is our workhorse shuttle machine. It is large enough to handle considerable production volume in an industrial setting but is small enough to use in a stand alone application. Having a larger frame than the XST-1000, the XST-2000 can support larger tooling allowing for increased capacity. The heavy duty stainless steel construction keeps our machines running year after year. If you are looking for high capacity, extreme durability and reliability, this is the machine for you. Our engineers will custom design and build tooling to fit your unique criteria, or we stock tooling for many common cups and trays used in today's rapidly evolving market.

### FAST
– Automatic feed and seal feature
– Display shows number of cycles sealed in shift
– 5 minute warm up time
– Simple pocket and die change over
– Seals up to 10 cycles per minute, depending on tray size and material

### VERSATILE
– Interchangeable pockets and dies
– Custom pockets and dies available
– Choice of automatic or manual seal
– Optional date printer
– Adjustable heat settings & dwell time
– Registered print capability

### SAFE
– Automatic Shut Off to Prevent Injury
– All moving mechanisms are guarded, closing off potential pinch points

### QUALITY
– Die cuts around container for an attractive look
– Consistent, Leak-Proof Seals
– Film tensioner provides a wrinkle-free seal
– Low maintenance
– Heavy duty, stainless steel construction
– 12 month warranty on parts
– Digital controls with microcomputer program

**MACHINE DIMENSIONS**
18.90" x 27.75" x 32.30"

**MAX SIZE TRAY DIMENSIONS**
12.60" x 9.84"

**MAX WIDTH OF FILM**
13.00"

**MAX DIAMETER OF FILM ROLL**
9.00"

**MAX PACKAGING SPEED**
1-up: 500 trays per hour
2-up: 1000 trays per hour
4-up: 1,500 trays per hour

**ELECTRICAL REQUIREMENTS**
220 Volt, 1 Phase

**POWER CONSUMPTION**
10amps

**NET WEIGHT**
209lbs

**COMPRESSED AIR REQUIREMENTS**
2HP Compressor

**FOR ONE TRAY**

**FOR TWO TRAYS**

**FOR FOUR TRAYS**
