The XST-6000 is a multifunction in-line sealing machine designed for full production capacity in a compact space. Capable of outputting 2160 units per hour, this machine's stainless steel construction and high-strength alloys ensure you will have years of trouble-free service. All 140 Packaging sealing machines are capable of synchronization with other machines such as depositors and conveyors for a truly hands-free operation. We are so confident in the quality and durability of our machines we offer lifetime access to our technical support line and a full 1-year warranty on all parts. Our engineers will custom design and build tooling to fit your unique criteria.

SPECIFICATIONS

MACHINE DIMENSIONS

99" x 40" x 63"

MAX SIZE TRAY DIMENSIONS

Customizable
